WAGONHAMMER Ranches

45th annual

TOTAL PERFORMANCE PRODUCTION SALE

March 18, 2020

BARTLETT, NE

DEAR FELLOW CATTLEMEN,

Welcome to the 45th edition of the Total Performance Production Sale. This year represents a new beginning for our program. This set of bulls and females represent our breeding philosophy that is centered around commercial profitability, balanced EPDs and consistency. You'll find many large sire groups backed by proven sires whose daughters roam our pastures. Our goal is to give you groups of ½, ¾, and/or full brothers that will help add uniformity to your calf crop. For past customers, we have traveled throughout North America to find outcross genetics that meet your genetic and phenotypic standards.

In today's seedstock industry, we are in a rat race chasing the latest and greatest number package or index at the cost of so called "convenience" traits that we find economically relevant. Fertility and longevity of both the bull and female are two main drivers of ranch profitability. Docility is an underrated economic trait. Docile cattle are more consistently more feed efficient and healthier with less stress on man and beast. Soundness in feet, legs and udders means longer lives and less cost in treatment and time. These are not just traits of convenience to our program. They influence every decision we make on the ranch.

We keep our eyes on the economically relevant traits using the best technology available to us. We are working towards having our entire cow herd genomic enhanced to increase the accuracy of our matings. We work with the American Angus Association, American International Charolais Association, land grant universities and research centers to stay on the cutting edge of technology. But we are staying grounded to the fundamentals of profitability for your cow herd and ours: Fertility, longevity, docility and soundness. This offering represents our commitment of over 100 years to the beef industry.

We look forward to seeing you in Bartlett on March 18th.

Sincerely,

JAY WOLF
Owner

JOE EPPERLY
Director of Genetics and Sales

SALE SCHEDULE

MARCH 17

12 PM – CATTLE ON DISPLAY

5 PM – PRE-SALE PARTY

MARCH 18

9 AM – CATTLE ON DISPLAY

12 PM – LUNCH | SPONSORED BY ZOETIS

1 PM – TOTAL PERFORMANCE PRODUCTION SALE

TERMS & CONDITIONS

Standard Terms and Conditions as adopted by the American Angus Association and American International Charolais Association respectively.

PRE-SALE PARTY

You are invited for drinks and Wagonhammer Beef, Tuesday, March 17, 2020 beginning at 5:00 P.M. at the sale facility. All of us will be there to answer any questions you may have about our cattle program.

• Videos, Updated EPDs, Ultrasound & Scrotal Measurements: Available sale day and on the website: www.wagonhammer.com.

FERTILITY

All bulls selling have passed a semen test. Town & Country Vet Clinic at Albion fertility tested and scrotal measured the bulls. Feel free to contact Dr. Jeremy Young or Dr. Cody Gulbrandson with any questions at (800) 657-2119.

BREEDING GUARANTEE

Bulls selling for more than $3,000 are guaranteed for 90 days from first turnout against breeding injury. If a replacement bull is available, he will be provided. If a replacement bull is not available, credit will be given in next year's Wagonhammer Sale. Credit will be the purchase price less volume discounts and salvage value of the injured bull to be used for the purchase of one replacement bull. Please notify us as soon as possible should injury occur and prior to the injured bull being sold for salvage. All claims must be prior to Oct. 1, 2020. This is not a mortality insurance policy. Mortality insurance will be available sale day through American LiveStock Insurance and FischerRounds & Associates. Sale day contact Jim Geis (970) 590- 0500 or Calli Williams (605) 695-1990. Any deviations from the above statement will be worked out between the buyer and Wagonhammer Ranch.

RETAINED SEMEN INTEREST

Sellers retain 1/3 semen interest on all bulls selling. Buyers receive full possession and all salvage value.

DELIVERY

We are glad to deliver or arrange trucking for your bulls within 300 miles of Bartlett, NE. We will begin delivery starting April 1. We offer a $100 credit per bull if you take them day of the sale.

BULL BUYER'S VOLUME DISCOUNT

On 5 or more bulls - 5%
On 10 or more bulls - 10%

ONLINE BIDDING & BROADCASTING

The sale will be broadcast live with online bidding on SuperiorLivestock.com and SuperiorClickToBid.com. Please register to bid at least 24 hours before the sale. See page 13 for complete information.

CALVING EASE

We pride ourselves on providing you our valued customers with bulls that will produce calves that are born easily, get up quickly and start growing. We also recognize that not every bull needs to breed heifer and so we have created a system to identify the potential heifer bulls in the sale via a star rating system. Please use the key below to help understand our recommendations on how each bull can be used based off their EPDs, actual performance, dam's production record and pedigree history.

5 STAR CALVING EASE - No doubt heifer bull. He was born light and unassisted. His EPDs are elite for calving ease. His sire, dam and maternal grandsire have a history of calving ease.

4 STAR CALVING EASE - EPDs for CED and BW suggest he should work well on heifers. Born with moderate birth weight and born unassisted. Pedigree has history of calving ease.

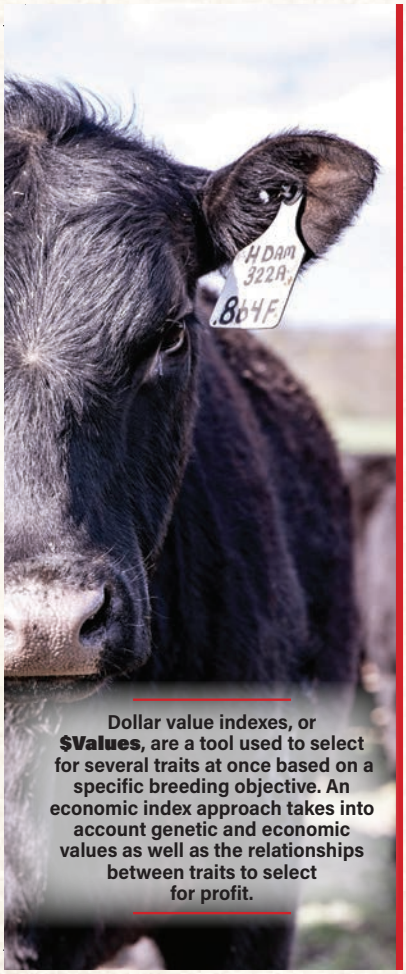
3 STAR CALVING EASE - EPDs for CED and BW suggest calving ease. Born with either heavier actual weight unassisted or smaller actual weight with abnormal presentation. Can be used on heifers with caution especially that are more developed prior to first calving (weighing 1150 +). These bulls will fit well to breed wet two year olds. Pedigree has calving ease history.
Bulls without highlighted calving ease – bulls that aren't highlighted for calving ease will have typical Angus characteristics for easy calving but their numerical indicators and history tell us that they will work best on cows to maximize growth.

Our Charolais bulls average in the top 25% of the breed for calving ease but we only breed Purebred Charolais heifers to Charolais bulls. Our commercial heifers are all bred to Angus bulls and so the Charolais are not scored for calving ease like the Angus. Please use CED as you evaluate those bulls for use in your program.

TOP DOLLAR & CAB LOGOS

We have joined a partnership with Top Dollar Angus to help supply high quality genetics to the feeding industry and to help connect you, our customers, with those buyers looking for high quality genetics. More information about the program is on page 53.

The American Angus Association and Certified Angus Beef have launched a program to recognize bulls with the genetic potential to expand the supply of CAB beef in the marketplace. More information on this logo and it's definition is on page 21.



Dollar value indexes, or $Values, are a tool used to select for several traits at once based on a specific breeding objective. An economic index approach takes into account genetic and economic values as well as the relationships between traits to select for profit.

American Angus Association $Value Indexes

Maternal Weaned Calf Value ($M), an index expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. $M is built off of a self-replacing herd model where commercial cattlemen replace 25% of their breeding females in the first generation and 20% in subsequent generations. Remaining cull females and all male progeny are sold as feeder calves. Increased selection pressure on $M aims to decrease overall mature cow size and improve foot structure and fertility while maintaining weaning weights consistent with today's production.

Weaned Calf Value ($W), an index expressed in dollars per head, provides the expected difference in future progeny preweaning performance from birth to weaning. $W assumes that producers retain 20% of their female progeny for replacements and sell the rest of their cull female and male progeny as feeder calves. Over time, increased selection pressure on $W will increase weaning and maternal milk traits while also continuing to increase mature cow size.

Feedlot Value ($F), an index expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires. The underlying objective assumes commercial producers will retain ownership of cattle through the feedlot phase and sell fed cattle on a carcass weight basis with no considerations of premiums or discounts for quality and yield grade.

Grid Value ($G), an index expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

Beef Value ($B), an index expressed in dollars per carcass, facilitates simultaneous multi-trait genetic selection for feedlot and carcass merit. $B represents the expected average differences in the progeny post-weaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a quality-based carcass grid.

Combined Value ($C), an index expressed in dollars per head, includes all traits that make up both $M and $B with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and eventually sell them on a quality-based carcass merit grid.

116 weaning and 111 yearling ratios out of a Pathfinder cow. He will have GE-EPDs by sale day.

HOW TO PARTICIPATE AS AN ABSENTEE BUYER

We have made preparations to bid and buy livestock through Superior Productions' "Call or Click-To-Bid" service for those unable to attend in person on sale day. Please note that all of the lots in the sale will also be available for viewing online prior to sale day at www.superiorlivestock.com.

HERE'S HOW IT WORKS

Turn in Bids Over the Phone. This is our traditional method of buying livestock. To get started simply go online to www.superiorlivestock.com and click on the tab titled "Register for a Buyer Number". Select the registration form for Superior Productions and print the registration form, fill it out and fax it in to Superior Productions at (817) 378-3380 with a signature on it, or scan and email the form to info@superiorauction.com. You can also mail it in to the address provided on the form. Upon receipt of this information Superior will call you with a buyer's number and the bid line phone number that you will use on sale day to place bids over the phone.

Click-To-Bid. This is Superior's online bidding platform for cattle buying. Please note that high speed internet is required – ***this is not for dial-up or satellite internet.*** Registration is free, but you must become a member of www.superiorclicktobid.com to sign up. Becoming a member is easy - just go to the homepage of www.superiorclicktobid.com and follow the out-lined steps to get started. Input your information and select a username and password. You will receive an e-mail confirming you are a member. From that point forward you just have to sign in and select the sale you would like to register for and once approved you will receive an e-mail confirming which sale you are now registered for.

Viewing the Auction. There are 2 places to view the sale broadcast live on the internet: www.superiorlivestock.com or www.superiorclicktobid.com. Just go to the home page of either website and select the auction. If you just want to watch the auction on your computer, smartphone or tablet go to www.superiorlivestock.com, but if you want to bid over the computer you must go to www.superiorclicktobid.com. Remember you can call in to bid on the internet, but you must be a member of www.superiorclicktobid.com to "click-to-bid". Your computer must have Flash Media Player installed for this website to view the auction. If you have any questions, please call the Superior Productions office at 800-431-4452.

*If you plan to bid by phone through Superior Livestock or 'Click-to-Bid', you must register at www.superiorlivestock.com prior to bidding.

When we leased Regiment, it was so we could turn out two Arsenal sons together. We should've expected just how big and stout these would be as he grew into a mature bull here. This set of brothers would look cool on one group of cows. With their consistency, it'll be a great set of calves.

Top Dollar Angus Feeder Calf Program

Top Dollar Angus is a genetic-certification and marketing company focused exclusively on the top 25 percent of the industry in carcass and growth Angus and Red Angus-influenced feeder cattle. Top Dollar Angus is a program similar to other popular branded-beef programs, except that Top Dollar Angus does its branding in the feeder cattle and calf market.

Qualified herds must have two or more generations of Angus (Black or Red) genetics with growth and carcass traits objectively ranking in the top 25 percent of the breed based on documented historical sire use. DNA evaluation conducted by Zoetis or GeneSeek is another workable method to qualify. Once your cattle have met the necessary requirements, they will be marketed under the Top Dollar Angus brand and logo, and will be promoted aggressively to a large number of feed yards and buyers. In today's market, Top Dollar Angus cattle are seeing premiums ranging from $30 to $70 per head above the average market.

Why the premium? Cattle feeders know that Top Dollar Angus cattle perform better and have higher grid-based carcass rewards compared to other cattle. This puts more dollars per head into the cattle feeder's pocket, which can be passed back to the producer in the form of premiums paid above market price.

Top Dollar Angus helps take the guess work and surprises out of growing and feeding cattle. Feed yards are tired of unpredictable performance and wide-ranging profitability results from group to group on cattle they purchase. Cattle often look the same and have the same colored hides, but are very different genetically. That's why the genetic certification of high-end Angus and Red Angus feeder cattle is here! The industry must differentiate the best Angus and Red Angus genetics from average cattle, and that's what Top Dollar Angus will do for you!

If you have consistently invested in high-performance Angus or Red Angus genetics, Top Dollar Angus will make your cattle stand out from the pack and get you the premiums you deserve. No matter how you market your cattle, our goal is to create more demand and higher prices for your calves.

If you look at this one's photo and see him in person, you bound to be excited. He's phenotypically the coolest bull in the fall offering. 117 IMF ratio with a 111 RE ratio isn't bad either for coming off summer grass. Genomics didn't like him for growth but he stillgets a CAB stamp and is elite for maternal value.

These 5 flush mates are at the forefront of modern Charolais genetics. Their brother is the featured Select Sires Charolais bull, WR Travel Agent. Their maternal sister produced the ST Genetics sire WR Foreman. Their grandmother produced the 2018 NWSS Champion Composite Charolais heifer. Sired by the Select Sires featured LT Affinity. These guys are royally bred and each of them are impressive phenotypically.

Owned with Mr. K Angus

WAR Cavalry B063 Z044 was the lead off lot in Wagonhammer's 2015 Total Performance Sale. This Connealy Cavalry son out of a great CC&7 female had the Top WW & WW EPD, 2nd Top ADG, and Top YW & YW EPD in the entire Wagonhammer lineup. He is currently in the top 1% of the breed for $B, $F, $C and YW. His first daughter offered at auction brought $95,000 with 4 daughters averaging over $30,000 the same day. His sons highlighted the NWSS Angus Bull Sale at $85,000 and $22,000. His daughter was a high seller at the Bases Loaded at $70,000. He tragically was struck by lightning this past summer and semen is limited. This will be one of the few opportunities you'll have on this semen in 2020.

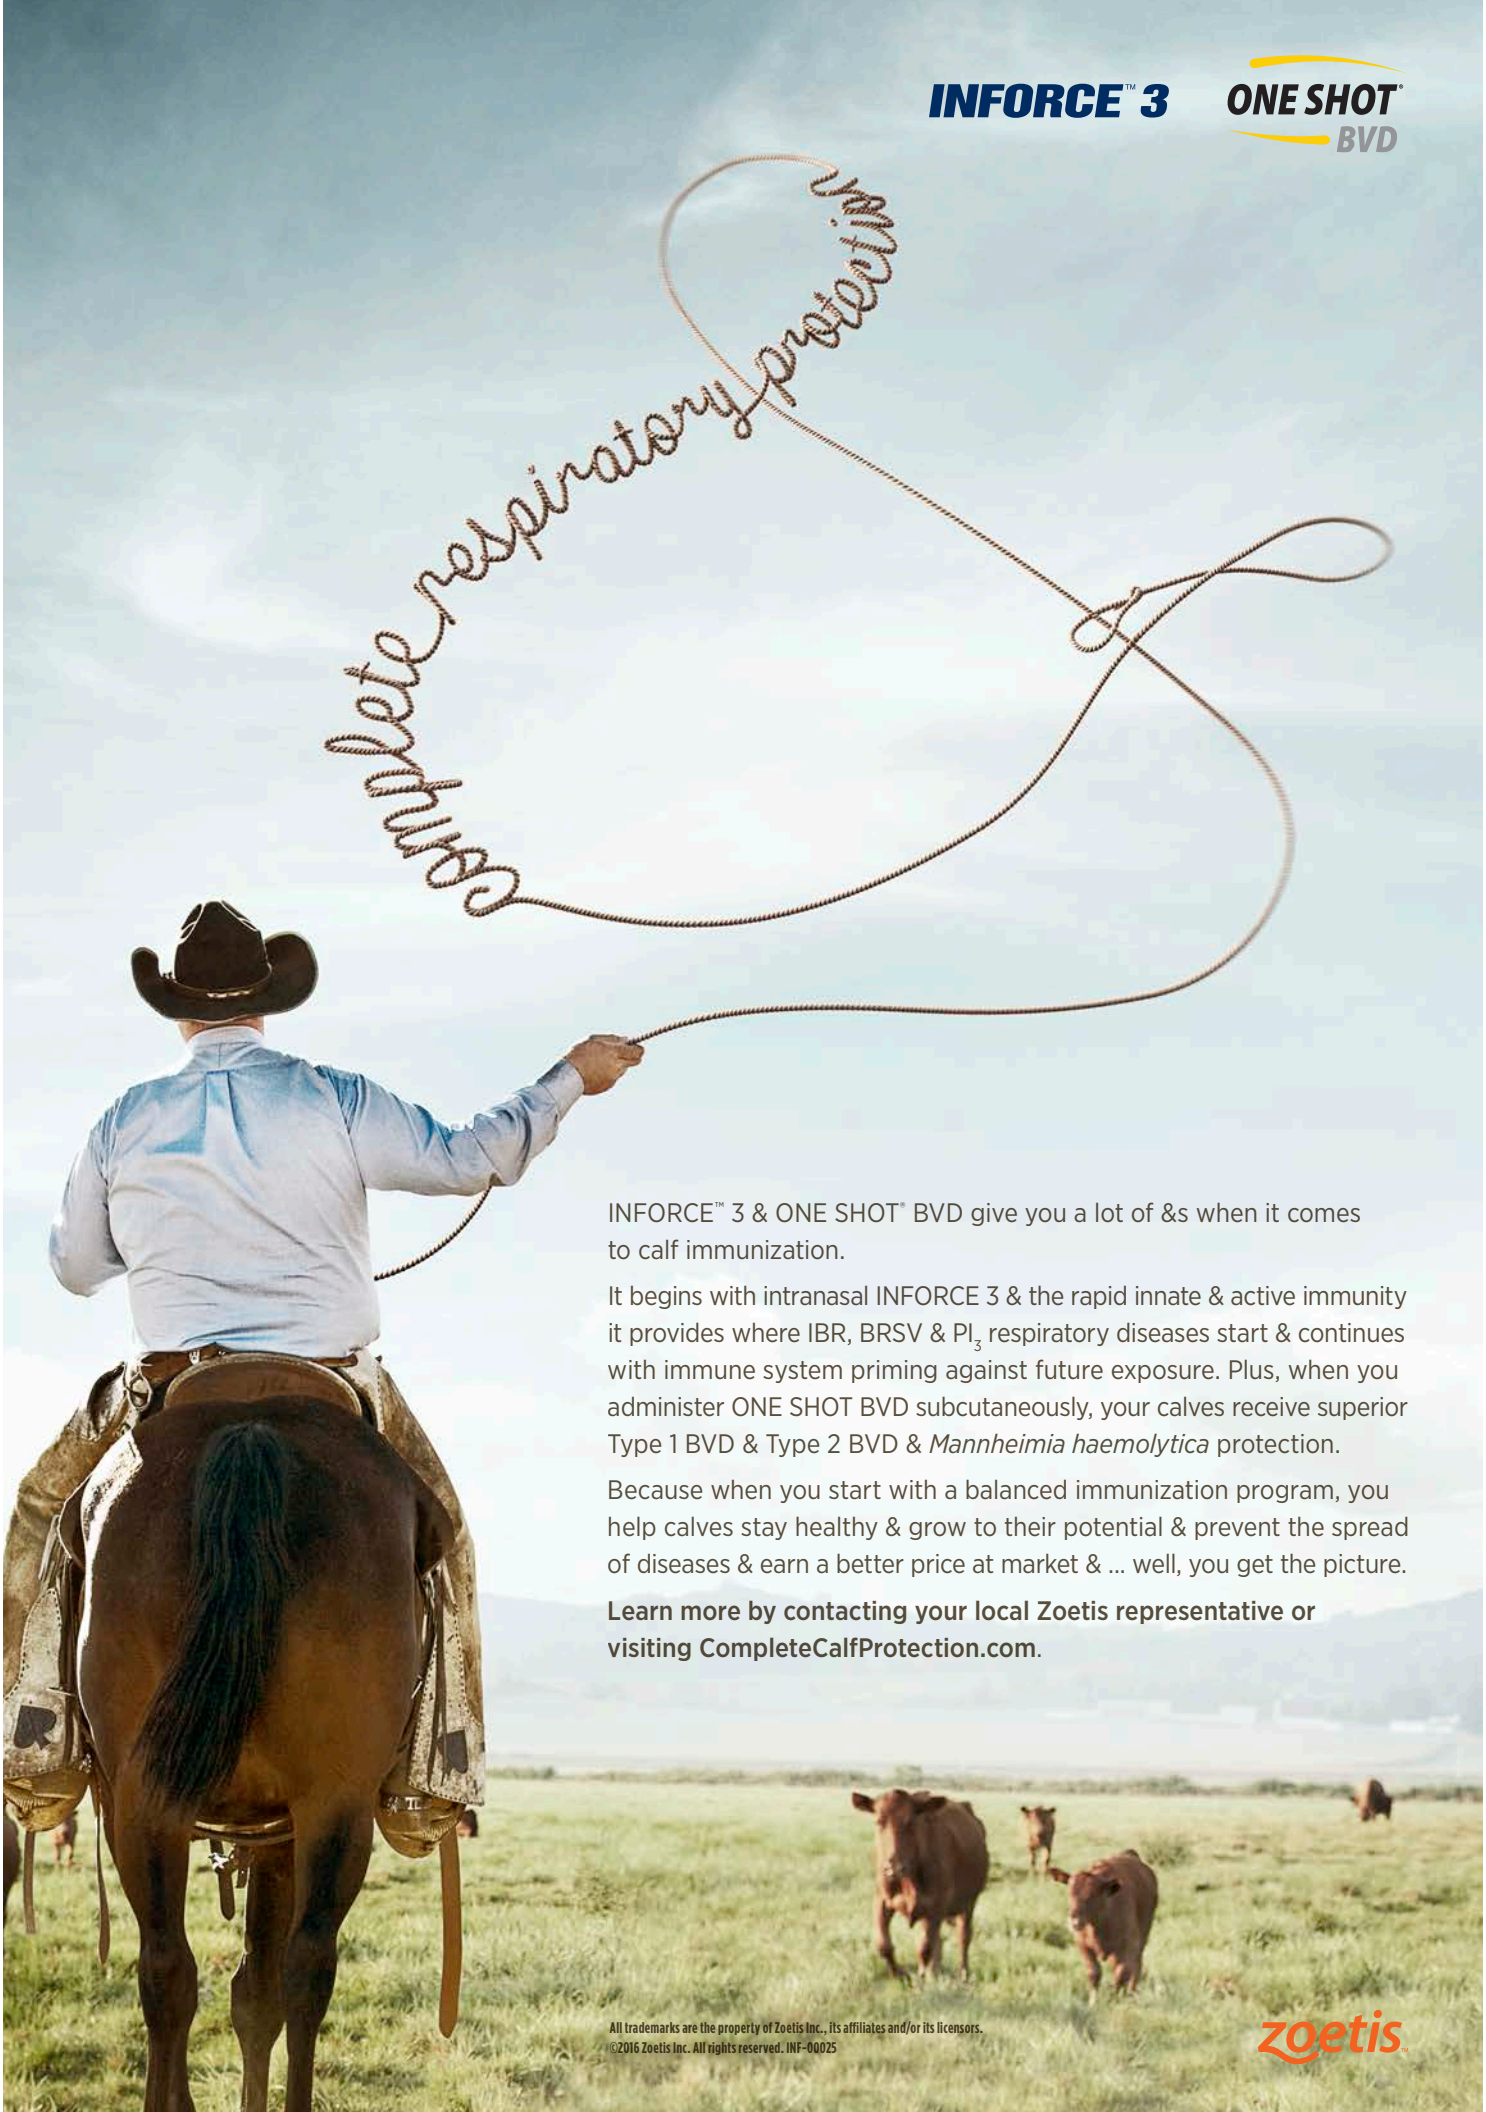
Ultrasound confirmed due 8/24/2020 to E&B Plus One
With the Cavalry feature, we thought we should show you a daughter. This is a whale of a cow represents the growth and power of the B063s.
She's long and comes out of a cow with a 7/103 nursing ratio. She's just turning 4 this spring and in the prime of her life.



INFORCE™ 3 & ONE SHOT® BVD give you a lot of &s when it comes to calf immunization.

It begins with intranasal INFORCE 3 & the rapid innate & active immunity it provides where IBR, BRSV & PI_3 respiratory diseases start & continues with immune system priming against future exposure. Plus, when you administer ONE SHOT BVD subcutaneously, your calves receive superior Type 1 BVD & Type 2 BVD & *Mannheimia haemolytica* protection.

Because when you start with a balanced immunization program, you help calves stay healthy & grow to their potential & prevent the spread of diseases & earn a better price at market & … well, you get the picture.
